

API.DATEINVITE.COM ROUTES

- The base url is: <http://api.dateinvite.com>
 - We work with a **token** instead password in requests
 - You need to do login to get the token from user
 - Use POST method for all requests to API
 - You need to send **email** and **token** for **ALL REQUESTS** (except login and register) using **http header basic auth**
 - Some routes accept input data through json (the possible keys are included as nested list in routes that accept inputs)
 - We recommend to use a REST Console to get the responses from api (https://chrome.google.com/webstore/detail/rest-console/cokgbflfommojglbmbpenpphppikmonn?utm_source=chrome-ntp-launcher)
-

USERS

- /users/register.json
 - send **email** and **password** as http header basic auth
 - {"name":"","birthday":"yyyy-mm-dd","ios_token":"","android_token":"","invisible":"1/0"}
- /users/login.json
 - send **email** and **password** as http header basic auth
 - {"ios_token":"","android_token":"","invisible":""}
- /users.json
 - {"page":"page-number","education":"education-options","body_type":"bodytype-options","language":"language-options","ageFrom":"number","ageTo":"number","available_for":"available-options","Looking":"looking-options","drink":"drink-option","has_kids":"1/0","current_status":"status-options","faith":"faith-options","location_filter":"location-search","ethnicity":"ethnicity-options","username":"username-search"}
- /users/save.json
 - {"gender":"","gender_seeking":"","faith":"","smoker":"","drink":"","current_status":"","ethnicity":"","has_kids":"","about":"","height":"","body_type":"","education":"","occupation":"","language":"","available_for":"","photo":"photo-hash","cover":"cover-hash","video":"video-hash","sayhi":"sayhi-hash","city":"","state":"","country":"","lat":"latitude","lon":"longitude","invisible":"1/0","push_message":"1/0","push_sayhi":"1/0","push_invite":"1/0","photos":["photo-hash","photo-hash2"]}
- /users/check_username.json

- {"username":""}
 - /users/me.json
 - {"ios_token":"","android_token":""}
 - /users/counters.json
 - /users/view.json
 - {"user":"user-id"}
 - /users/change_password.json
 - using http header basic auth
 - user field: old password
 - pass field: new password
 - {"email":"xxxxxxxxx"}
 - email of user
-

BLOCKS

- /blocks.json
 - /blocks/create.json
 - {"user":"user-id"}
 - /blocks/remove.json
 - {"user":"user-id"}
-

INVITES

- ~~/invites.json~~
 - ~~/invites/create.json~~
 - ~~{"video":"video hash", "to":"user id"}~~
 - ~~/invites/view.json~~
 - ~~{"id":"invite id"}~~
 - ~~/invites/hide.json~~
 - ~~{"id":"invite id"}~~
-

LIKES

- /likes/liked.json
- /likes/liked_me.json
- /likes/create.json
 - {"user":"user-id"}
- /likes/hide.json

- {"id":"like-id"}
-

PHOTOS

- /photos/upload.json
 - send file attached
-

VIDEOS

To upload video, use the route: <http://media.dateinvite.com/upload.php>
It accepts video file and returns a hashed_id

- /videos.json
 - /videos/play.json
 - {"id":"video-id"}
 - /videos/create.json
 - {"video":"video-hash", "to":"user-id"}
 - to invite: {"video":"video-hash", "to":"user-id", "invite":"1"}
 - /videos/view.json
 - {"user":"user-id"}
-

VISUALIZATIONS

- /visualizations.json
 - /visualizations/hide.json
 - {"id":"visualization-id"}
-

WANTINVITATION (SAY HI)

- /want_invitation.json
- /want_invitation/play.json
 - {"id":"want-invitation-id"}
- /want_invitation/create.json
 - {"video":"video-hash", "to":"user-id"}
- /want_invitation/hide.json
 - {"id":"want-invitation-id"}

MESSAGES

- /messages.json
- /messages/view.json
 - {"id":"message-id"}
- /messages/create.json
 - {"message":"message-text", "to":"user-id"}
 - to invite: {"message":"message-text", "to":"user-id", "invite":"1"}
- /messages/chat.json
 - {"user":"user-id"}

MESSAGES UPDATE (2017-08-09)

- /messages.json
 - same keys
- /messages/view.json
 - i dont think we will use this route
- /messages/chat.json

```
{
  "response": "1",
  "auth_msg": "1",
  "header": {
    "text": "Administrador",
    "counter": "10",
    "action": "reply",
    "user": {
      "id": "899",
      "name": "Administrador",
